دستگاه های اینورتر جوشکاری تکفاز با الکترود پوشش دار

Model:

Mini-EL 202, 202 DG Cell

مدل:

These machines are the latest evolution in inverter based welding generator's technology. The most advanced materials and components have been used to design and produce the welding power source.

EXCELLENT FEATURES OF MACHINE

- ◆ Very easy arc striking, constant arc and very low electrical consumption.
- ◆ High frequency power INVERTER with latest type of IGBTs.
- ◆ Stability against welding current variations by using very long electric cables
- ◆ Mini el 202 DG cell models have digital display with ability of:
 - Preset and real current display
 - "HOT" error display in the case of overheat
 - "LV" error display in the case of low input voltage
- ◆ Selector with 2 weld procedures:
 - Electrodes welding with built in hot start and Arc force
 - TIG welding with thermal controlled(TCS)"lift" type striking to minimizing tungsten inclusions and also capability of welding on sharp edges
- ◆ Resistant against fluctuations and undesirable functional of old and inferior generator (MINI EL 202 DG cell)
- ◆ Ability to adjust the welding current continuously
- ◆ Constant current characteristic and stable arc
- ◆ Reduce weight and dimension due to the use of advanced inverter technology
- ◆ Service & warranty
